SCIS Connect

Less searching. *More moving forward.*

for students, alumni, faculty & recruiters

BUILT BY YOUR PEERS

ILLUSTRATED EDITION

ILLUSTRATION Cover art references the SCIS Connect development team (Kumar Shivam, Adarsh Pandey, Sahil Kumar). Not a screenshot.

START HERE · PLACEMENT PREP · ALUMNI CONNECT · FACULTY & ADMIN · MEET THE BUILDERS

28 PAGES · FREE TO SHARE

A CAMPUS COMPANION

One community. *Many ways to grow.*

Read the pages that matter to you today. Come back for the rest when you need them. Every page follows the same pattern: why it helps, where to find it, what to do, what happens next.

03 **Why SCIS Connect exists** Three campus situations it makes easier

04 **Start here** Sign up, verify, sign in, do one useful thing

05 **Find your workspace** Placement Prep, Alumni Connect and the other entrances

06 **Build a profile that works for you** Identity, evidence, resume, privacy

07 **Practice that sticks** Dashboard, challenges and the leaderboard

08 **Assignments and tests** Rules, formats, submission and incidents

09 **Results and certificates** What a score tells you, and what it does not

10 **Placement Center** Jobs, saved listings, applications, experiences

11 **Two kinds of resume feedback** AI Resume Analyzer versus Resume Review

12 **Alumni Connect** The community half of the portal

13 **Finding people** Alumni, companies, batches and networking

14 **Mentorship and referrals** How to ask, and what to expect

15 **Community** Feed, events, forums and success stories

16 **SCIS Family** Your programme, your batch, your people

17 **For recruiters** Find evidence, start a conversation

18 **Faculty: build an assessment** Question Bank, Question Guide, Test Builder

19 **Faculty: run and review** Gate, monitoring, evaluation, reports

20 **Delegated roles** TA, PC, CR and DCR explained

21 **The admin console** Nine groups, one purpose each

22 **Notifications and your phone** Inbox, email, push and mobile use

23 **Help and account safety** Recovery, devices, support

24 **What is next: Classroom** A clearly labelled status note

25 **Meet the builders** The seven people behind the portal

27 **Portal map and glossary** Every menu, every term, one page

28 **Your next step** One action per reader, link and QR

HOW IMAGES ARE LABELLED

PHOTO A real photograph supplied by the team. Classmates appear with their permission; no names are printed beside them.

ILLUSTRATION AI-assisted artwork referencing the seven developers. Not a screenshot, testimonial or staff portrait.

SCREENSHOT The live portal in September 2026, captured with real accounts. Personal details are cropped or masked.

DIAGRAM A simplified drawing of how something works. Not a screen.

READ THIS ONCE

Written against the portal's code reviewed on 13 September 2026 (frontend **4d0b2a7**, backend **7e75320**) and checked on the live site. Menus depend on your role, approval status and the deployed settings. Classroom is switched off by default; see page 24.

TA, **PC**, **CR** and **DCR** are explained on page 20; every other term is in the glossary on page 27.

THE PROBLEM WE ALL KNOW

Campus life is great. *Finding things is not.*

Test links buried in a chat group. A senior at the company you want, but no way to reach them. A resume nobody has read. SCIS Connect puts preparation, people and opportunities in one place, with a login you already have.

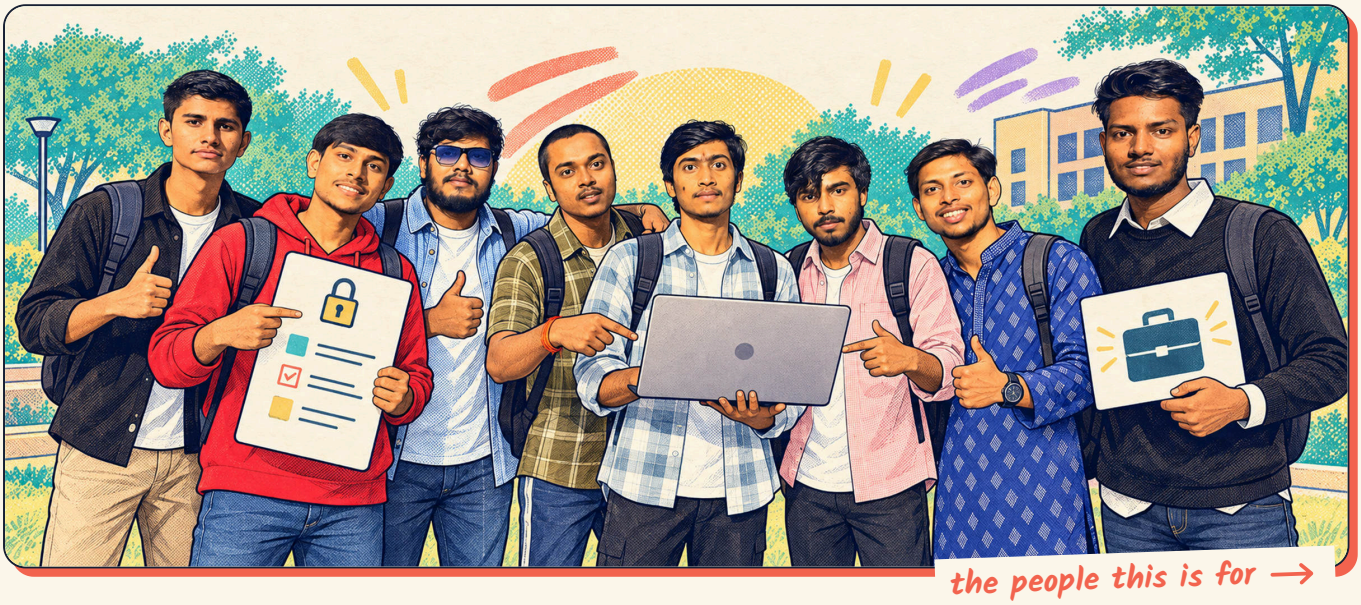

ILLUSTRATION Classmates, drawn from their photographs.

BEFORE

“Which group has the test link?”

WITH SCIS CONNECT

Assignments and tests sit in one list with their schedule, rules and your attempt status. Faculty publish; you open **Assignments** or **Tests & Results**.

BEFORE

“Does anyone know a senior at that company?”

WITH SCIS CONNECT

Alumni are searchable by batch and company. Mentorship and referral requests have a proper form, a status and a polite default.

BEFORE

“Is my resume actually ready?”

WITH SCIS CONNECT

Two kinds of feedback: an AI first pass with a score and suggestions, and a human review request that a community reviewer can pick up.

What it is

A community portal built by SCIS students for SCIS students, alumni, faculty and approved recruiters. Placement preparation, tests, a placement center, an alumni directory, community posts, events and forums, plus faculty tools for building and running assessments.

What it is not

Not a replacement for official department notices or results. Not an official University of Hyderabad system. Not a guarantee of a reply, a referral or a job. It is a shared tool, and it works best when the community keeps it accurate.

YOUR FIRST VISIT

Start small. *Make it yours.*

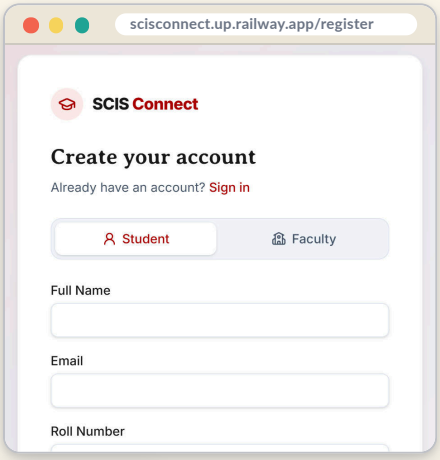

You do not need every menu on day one. One verified account, a complete profile and one useful action are enough.

01
Sign up
Choose **Student** or **Faculty** on the registration page and enter your real academic details.

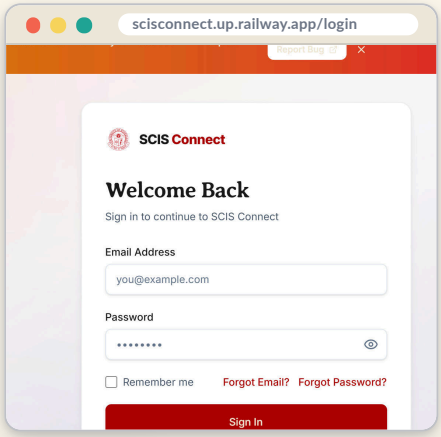

02
Verify
Open the verification link sent to your email. Check spam. Use the resend option if it does not arrive.

03
Sign in
Use your email and password. Tick **Remember me** only on your own device.

04
Do one thing
Complete your profile, then try a challenge, a job listing or the alumni directory.

SCREENSHOT Create your account: name, email, roll number and password. Faculty use the Faculty tab.

SCREENSHOT Sign in. Forgot Password sends a 6-digit OTP; Forgot Email recovers the address from your roll number.

Who gets access, and how

Students and alumni use the Student form. Your batch and community status follow your roll number. **Faculty** register on the Faculty tab; an admin approves the request before the teaching tools appear. **Recruiters** are added through an admin-reviewed request. **Admins** are invited by existing admins.

A wrong batch, role or community status is fixed through **Support** or **Registration Help**, never by creating a second account.

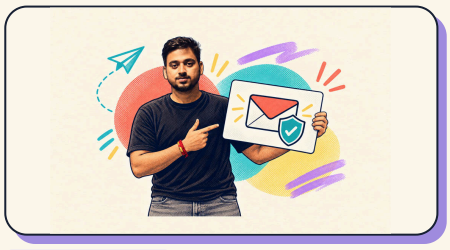

ILLUSTRATION Classmate, drawn from his photograph.

FIND IT **Register** · **Login › Forgot Password?** · **Login › Forgot Email?** · **Registration Help**

One caution. Use one account, your own. Duplicate accounts break batch lists, leaderboards and audiences, and they get removed.

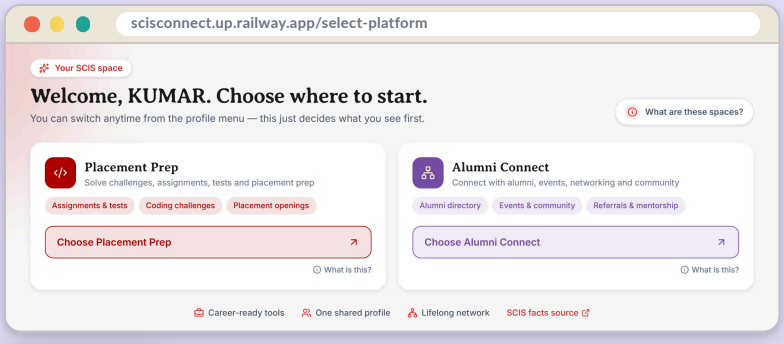

FIELD NOTE

*The site shows an orange banner: it is under active development. If a page misbehaves, report it through **Support** or **Report Bug** with the page, the time and the exact message.*

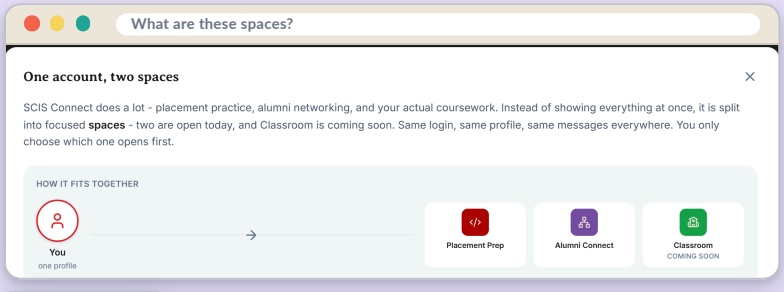

CURRENT STUDENTS

One account. *Two spaces.*

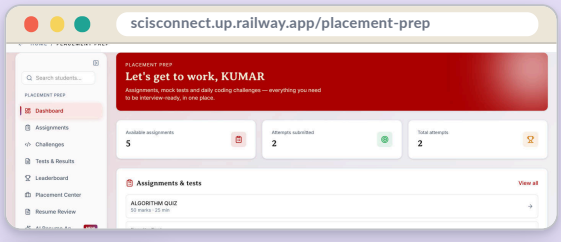

After sign-in, current students choose a space. The choice only decides what you see first. Your profile, messages and notifications are the same in both.

SCREENSHOT The space picker after sign-in. Classroom is not offered while it is shelved.

SCREENSHOT The "What are these spaces?" explainer on the same page: one profile, two open spaces, Classroom coming soon.

SCREENSHOT Choose Placement Prep and this dashboard opens, with the space's menu on the left.

SWITCH ANYTIME

Open the space menu at the top right (it shows the current space name) or the profile menu, and choose the other space. Nothing is lost.

Who lands where

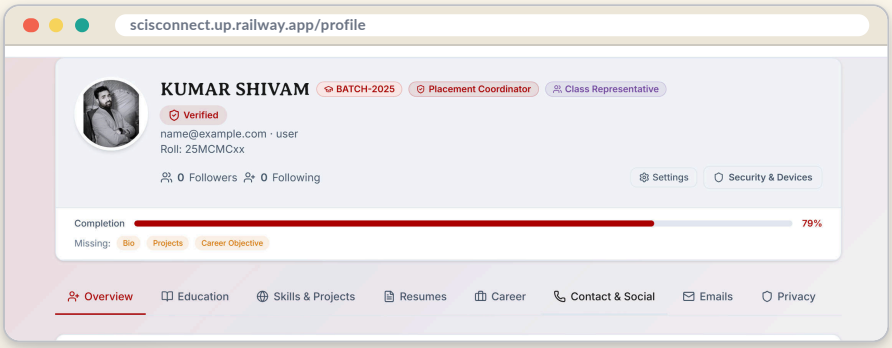

Placement Prep	The preparation half for current students: Assignments, Challenges, Tests & Results, Leaderboard, Placement Center, Resume Review, AI Resume Analyzer, My Certificates. Pick it first if you are preparing for tests or placements.
Alumni Connect	The community half for current students: Alumni, Events, Networking, Mentorship, Referrals, Companies, Batches, Community Feed, Success Stories. Pick it first if you want people.
Alumni	No space picker. An alumni dashboard with My Posts, Network, Correspondence, Companies, Referrals, Mentorship, Resume Review, Success Stories, My Certificates and Forums.
Recruiters	A recruiting dashboard with Talent Search, Students, Companies, Post Job and Forums. Access is approved by an admin.
Faculty	A teaching dashboard with the assessment tools on pages 18 and 19.
Admins	The management console on page 21. Super-admins have a wider view of the same console.

Shared by everyone: Profile, Messages, Forums, Support, Contact Us, SCIS Family. A friend may see a different menu because access follows role and approval, not the space they chose.

THE FOUNDATION

Let your work *introduce you.*

A useful profile gives people a reason to connect and gives opportunities the right context. It is shared across both spaces and visible to the community according to your settings.

SCREENSHOT The profile page: completion meter, missing sections, and tabs for Education, Skills & Projects, Resumes, Career, Contact & Social, Emails and Privacy.

Students

Explain what you can build: a few real projects, the tools you used, links that open. Keep programme, batch and roll number accurate; they drive eligibility everywhere else. LeetCode is optional: add your username and use **Fetch LeetCode Data**.

Alumni, faculty, recruiters

Keep your organisation, role and professional background current. Your profile is what a student sees before deciding whether to write to you, and what faculty and admins see when they grant access.

ILLUSTRATION Classmates, drawn from their photographs.

your profile is your handshake

PROFILE CHECKLIST

- [ ] **Identity** — correct name, programme, batch.
- [ ] **Evidence** — skills, two or three projects, working links.
- [ ] **Resume** — a current PDF with a clear file name.
- [ ] **Intent** — placement status and availability.
- [ ] **Privacy** — review what is visible before you share.

Profiles have a public view and community members can follow each other, so treat yours like a professional page: what you post, link and upload is what people will judge.

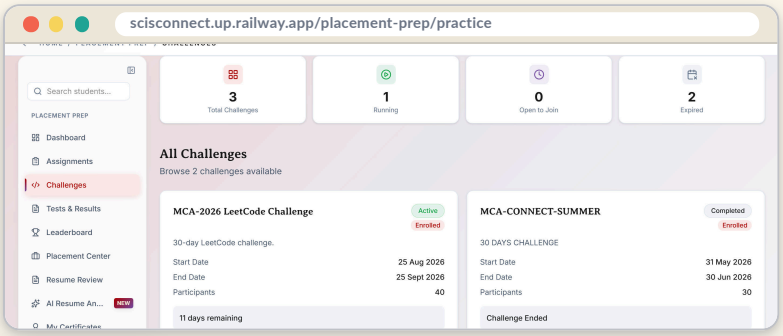

> **One caution.** Open your own resume file before you upload it. Remove unnecessary personal information such as home address or identity numbers. Do not assume every field is private.

FIND IT Profile Profile › Security & Devices

PLACEMENT PREP / CHALLENGES

Make practice *a repeatable habit.*

Small sessions are easier to return to than heroic ones. The dashboard shows where you stand; Challenges give you something concrete to do today.

SCREENSHOT Challenges: a 30-day LeetCode challenge with its dates and participants, plus Exam Challenges, which bundle several assessments into one window.

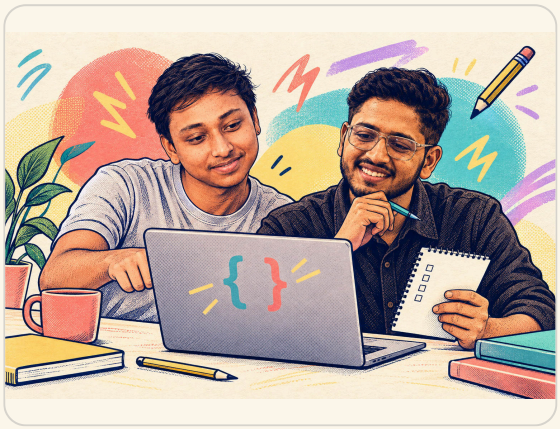

ILLUSTRATION Ashish Sharma and Garv Agarwal, drawn from their team portraits.

A WEEKLY ROUTINE

Pick a topic. Solve two or three problems. Write down the one you found hard. Come back to it next week. Repeat.

Challenges

Curated problem sets and practice challenges. Open one, read the statement, work in your editor or the runner, and submit. Each challenge can have its own leaderboard.

Leaderboard

A motivator, not a verdict. It reflects the activity the portal can see, including linked LeetCode stats where students have added them. Totals refresh on a schedule, not live.

Coding profile

Add your LeetCode username on your profile and use **Fetch LeetCode Data**. Check that the linked account is really yours before you compare numbers.

FIND IT **Placement Prep › Dashboard** **Placement Prep › Challenges** **Placement Prep › Leaderboard**

> **One caution.** A number on the leaderboard is not a measure of your ability. It is a measure of logged activity. Use it to notice a trend, not to rank yourself against a friend.

PLACEMENT PREP / ASSESSMENTS

Know the rules *before you start.*

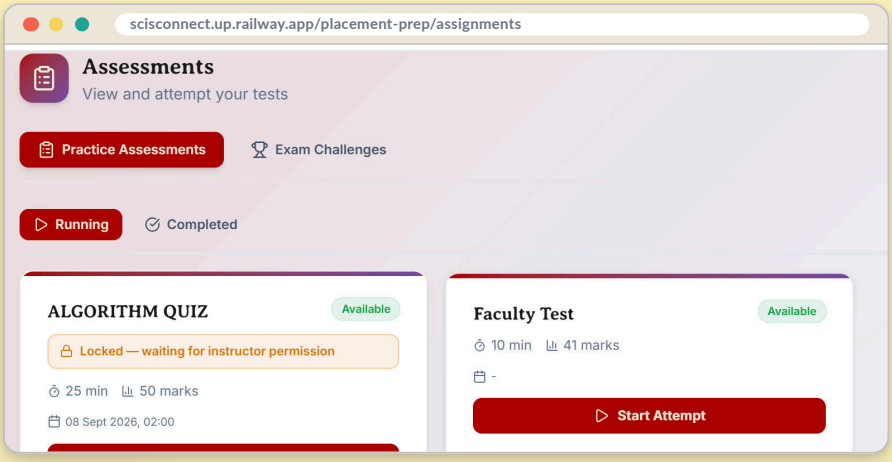

Assignments and tests are structured activities with a schedule, eligibility and rules set by the faculty member who published them. The portal enforces them.

01 Check
Eligibility, opening time, duration, attempts allowed.

02 Prepare
A stable device, a quiet place, the stated rules.

03 Attempt
Answer, save, submit. Follow any fullscreen or camera rule.

04 Confirm
Look for the submission confirmation before you leave.

SCREENSHOT Assessments published to you. A gated test shows “Locked — waiting for instructor permission” until the faculty member opens it.

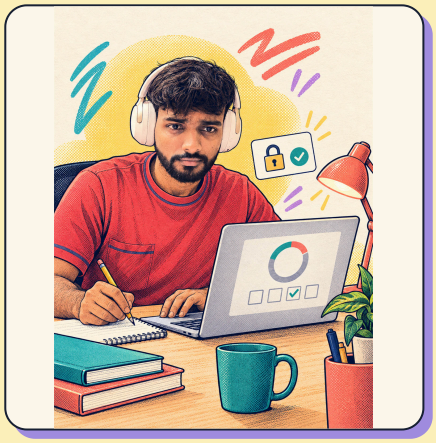

ILLUSTRATION Classmates, drawn from their photographs.

Before the timer starts

Open the activity from **Assignments** or **Tests & Results**. Read the instructions, marks, question formats and attempt limits. Some tests use a start gate: the faculty member opens it at the right moment and you enter from the published-test link with your own account.

Question formats you may meet

Single and multiple choice, true/false, integer and decimal answers, fill in the blanks, short and long answers, paragraph-based sets, matching, drag and drop, output prediction, debugging, coding with a runner, SQL, and case studies. Coding and SQL run against test cases; written answers may be marked by hand.

While you are working

Save as you go. Section timers, back-navigation and jumping between sections are decided by the test settings; the interface shows what is allowed. Fullscreen, camera or tab-switch monitoring may be on for proctored tests.

If something goes wrong

Note the test name, the time and the exact error. Tell the organiser or use **Support**. Do not open a second attempt or keep refreshing unless the interface tells you to.

> **One caution.** Running your code is not the same as submitting the test. Check the attempt status before you close the tab.

FIND IT Placement Prep › Assignments | Placement Prep › Tests & Results | Report an issue

LOOK BACK TO MOVE AHEAD

Your score is *a starting point.*

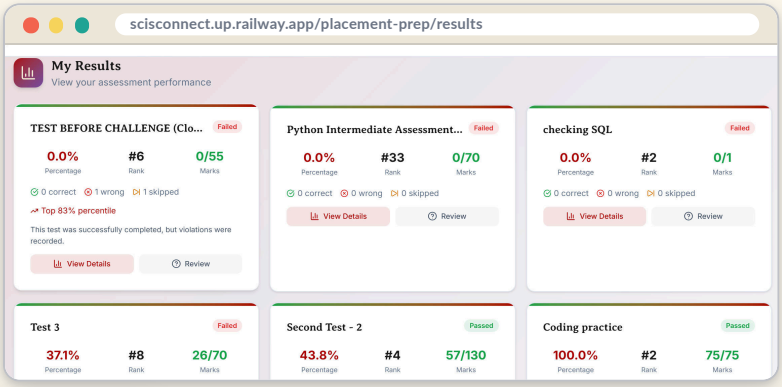

Results tell you what to work on next. Certificates keep any recognition you have earned in one place, with a public verification link.

01 Submit
Your attempt reaches the system with a timestamp.

02 Evaluate
Automatic marking, runner-based marking, or a faculty evaluation for written answers.

03 Release
Results appear when the test's release rules allow it.

04 Review
Open the attempt review to see questions, your answers and feedback where enabled.

SCREENSHOT My Results: percentage, rank and marks per attempt, with View Details and Review where the test allows it.

ILLUSTRATION Classmate, drawn from his photograph.

Read the status first

A submitted attempt may still be **awaiting evaluation** or **awaiting release**. The score, breakdown and feedback you see depend on what the organiser enabled for that test.

Ask a precise question

If something looks inconsistent, share the test name and the question or attempt reference with the organiser. Faculty have a re-evaluation tool; a leaderboard entry cannot fix a marking issue.

MY CERTIFICATES

Certificates issued to your account appear under **My Certificates**. Each carries a serial that anyone can check on the public verification page, so you can share the link with a recruiter.

Completing an activity does not automatically produce a certificate. Issuance is decided by the organiser.

CLOSE THE LOOP

Pick one weakness from a result. Practise it this week. Track your next attempt. Progress over time matters more than a single score.

FIND IT Placement Prep › Tests & Results

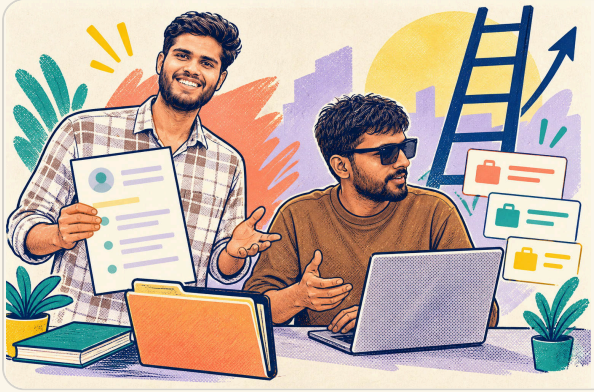

Placement Prep › My Certificates

certificate/verify

OPPORTUNITY WITH CONTEXT

Find it. Check it. *Apply.*

Discovery and follow-through in one place: from an interesting listing to your own application record, with peer-written interview experiences alongside.

Find a role. Show your work.

ILLUSTRATION Adarsh Pandey and Vijay Singh Parihar, drawn from their team portraits.

Jobs

Openings and internships with role, eligibility, location, deadline and the employer link. Filter, then open the detail page.

Saved

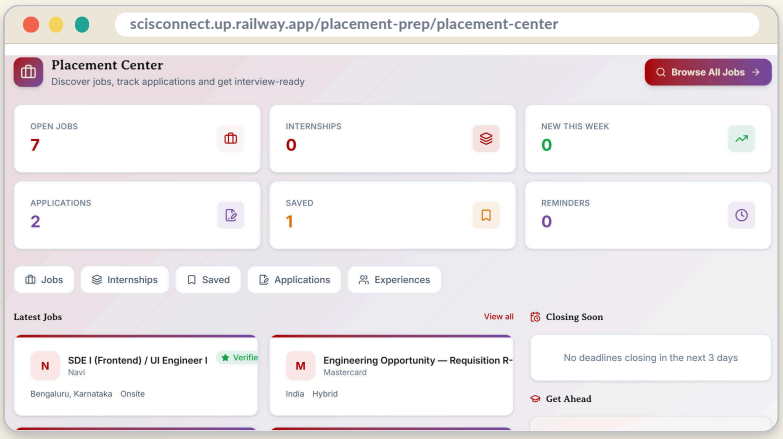

Bookmark listings you want to come back to. A save is a private shortlist, not an application.

Applications

Track what you have applied to and where it stands, so your search does not live in your memory.

Experiences

Interview experiences written by peers: rounds, questions, what helped. Read before you apply; write one after.

SCREENSHOT The Placement Center home: counts, the Jobs / Internships / Saved / Applications / Experiences tabs and the latest listings.

Reminders

Set a reminder for a deadline you must not miss. It is a nudge inside the portal, not a promise that a notification reaches every device.

One caution. Opening an employer link is not a completed application. Finish the employer's own form, then record it under Applications. Check the deadline and the opportunity yourself.

FIND IT Placement Prep › Placement Center | Placement Center › Jobs | Placement Center › Applications

TWO KINDS OF FEEDBACK

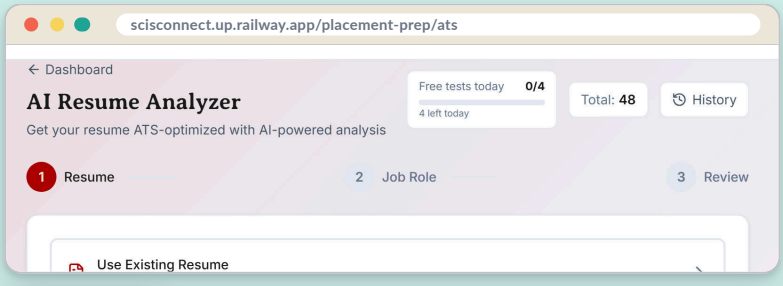

A better resume *is an iteration.*

The AI Resume Analyzer gives you a fast first pass. Resume Review asks a person for context. Use both; trust neither blindly.

	AI RESUME ANALYZER	RESUME REVIEW
What it is	An automated analysis of your resume against a target role or job description.	A request that a community reviewer (often an alumnus or senior) can claim and answer.
You provide	A PDF or an existing resume from your profile, plus a job role or pasted job description.	An accessible resume link, the target role and the specific question you want answered.
You get	A score, keyword and structure suggestions, and a history you can revisit.	Structured written feedback: strengths, gaps, suggestions. The request moves from **open** to **in review** to **completed**.
Time	Minutes. Analyses may queue; the page shows how many free analyses you have left today.	Days. It depends on a reviewer choosing your request.
Best for	Catching obvious gaps before you send anything.	Judgement calls: what to cut, how to describe a project, what a recruiter will notice.

ILLUSTRATION Classmates, drawn from their photographs.

SCREENSHOT AI Resume Analyzer: three steps, four free analyses a day, and a History of past runs.

Make feedback easier to give

Ask one clear question: *does my project section explain what I built and what I contributed?* Check that the resume link opens. Remove sensitive details and share only what the reviewer needs. Change one section at a time, re-run the analyzer, and close the review request when you are done.

FIND IT **Placement Prep › AI Resume Analyzer**

Placement Prep › Resume Review **AI Resume Analyzer › History**

> **One caution.** Feedback is advisory. A score does not guarantee that an applicant tracking system, a recruiter or an interview panel will agree with it.

THE CAMPUS DOES NOT END AT GRADUATION

Keep the *connection alive.*

Alumni Connect is the community half of the portal: people with shared academic roots and different professional journeys, plus the events, posts and stories that keep them in touch.

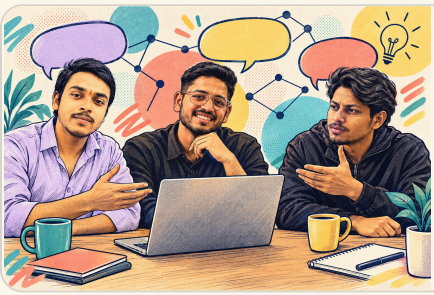

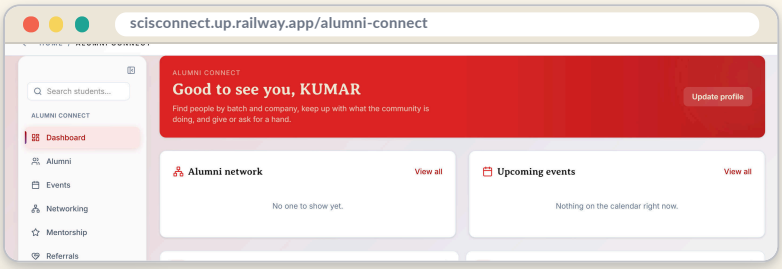

ILLUSTRATION Aman Kumar, Garv Agarwal and Sahil Kumar, drawn from their team portraits.

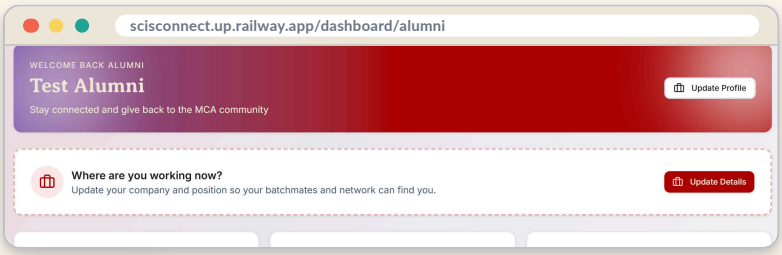

SCREENSHOT The Alumni Connect dashboard for a current student, with the space's menu on the left.

For current students

Find seniors and alumni by batch or company, read success stories and experiences, follow events, and make a specific, respectful request when you need one.

For alumni

Keep your profile current, answer a mentorship or referral request when you can, share an opening or a story, and use Network and Correspondence to stay in touch.

SCREENSHOT The alumni dashboard for graduates: update where you work, see mentorship and referral requests. Test server, test alumni account.

Graduates get their own entrance

Alumni skip the space picker. Their dashboard asks where they work now, counts students helped, mentorship and referral requests, and offers **Offer Referral** and **Set Mentor Availability** in one click.

FIND IT Alumni Connect Alumni dashboard

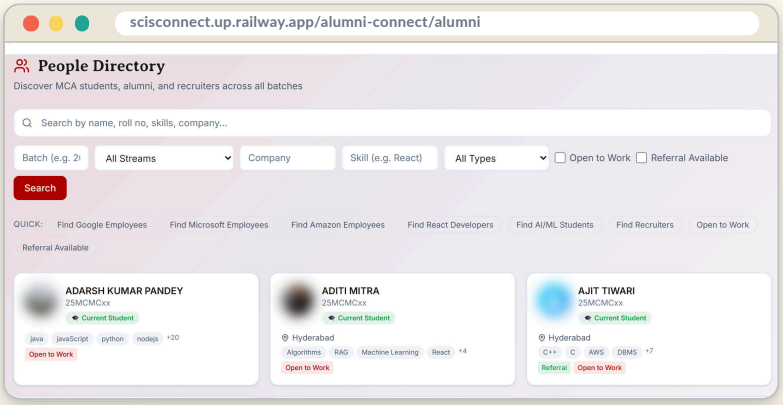

ALUMNI / COMPANIES / BATCHES

Go beyond *the directory.*

Three ways to find the right person: by name or skill in the Alumni directory, by employer under Companies, or by year under Batches. Then reach out like a colleague, not a form.

ILLUSTRATION Classmates, drawn from their photographs.

SCREENSHOT The People Directory: search by name, roll number, skill or company; filter by batch, stream and type; quick filters such as “Open to Work”. Profile photos blurred for print.

A first message that gets a reply

One line about you: name, programme, year. One line on why this person: their role, their company, a story they posted. One reasonable request with a clear scope, such as *fifteen minutes on how you prepared for system design rounds*. Thank them either way. Conversations live under **Networking** and **Messages**; alumni see them under **Correspondence**.

THREE WAYS IN

Alumni. Search and filter the directory. Open a profile for background, organisation and what they are open to; use **Connect** or **Message** from there.

Companies. Organisations where members work or have interviewed, with the people, openings and experiences linked to each.

Batches. People by graduating year. Shared professors and hostel stories make an honest opening line.

FIELD NOTE

Replies depend on the other person’s time. One polite follow-up after a week is fine. A third message is not.

FIND IT Alumni Connect › Alumni · Alumni Connect › Companies · Alumni Connect › Batches · Alumni Connect › Networking

A LITTLE DIRECTION HELPS

Ask well. *Give generously.*

Mentorship is guidance over a few conversations. A referral is an introduction to a specific opening. Both are favours, and the portal gives each a clear form and a status.

01 Find
Browse Mentorship for people open to it, or Referrals for openings alumni have posted.

02 Request
Send a short, specific request with your goal and, for a referral, the exact role and a readable resume.

03 Wait
The request shows as **pending** until the person accepts or declines.

04 Follow up
If accepted, take the next step the portal shows. If declined, thank them and move on.

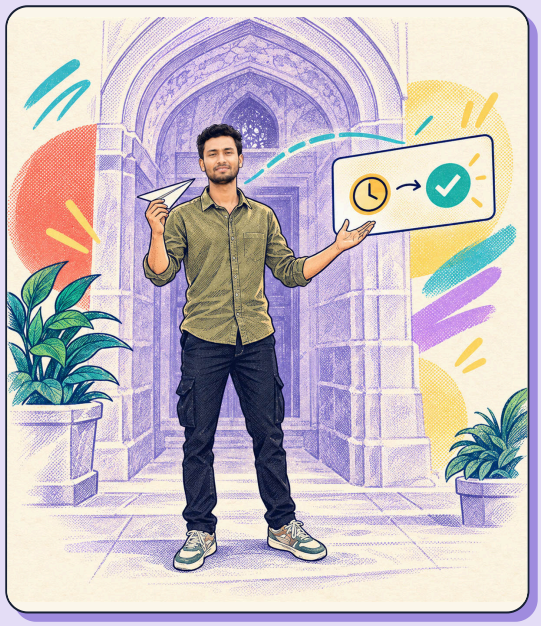

ILLUSTRATION Classmates, drawn from their photographs.

EXAMPLE REQUEST · WRITTEN FOR THIS GUIDE, NOT A REAL MESSAGE

"Hi, I'm a second-year MCA student preparing for backend internships. I've built a small REST API project (link on my profile). Could you suggest the two areas I should strengthen before applying? Fifteen minutes whenever suits you would help a lot."

Mentorship

Look for people whose interests match a question you actually have. Keep the first ask small. If it goes well, a longer arrangement can follow naturally.

Referrals

Only ask for a referral to a role you are eligible for and have read. Attach a resume that fits it. A referral gets your application seen; it does not decide the outcome.

One caution. An accepted conversation is not a job offer, and a referral is not a hiring promise. Never share login details, identity documents or unnecessary personal data in a request.

FIND IT Alumni Connect › Mentorship | Alumni Connect › Referrals | Alumni dashboard › Mentorship / Referrals

TAKE PART

Leave something *useful behind.*

The portal gets better when people add relevant, respectful contributions: a post, an event, a forum answer, a story. This page is the how.

ILLUSTRATION Classmates, drawn from their photographs.

Community Feed & My Posts

Share an update, an opening, or an experience. Give enough context for a stranger to understand it. Alumni manage what they have written under **My Posts**.

Events

Browse upcoming community events and **Register** for the ones you plan to attend. Read the date, venue or joining instructions; confirm changes with the organiser.

Forums

Ask a clear question in the right thread. Search before you start a duplicate. Answer when you know; say so when you are guessing.

Success Stories

Read how people approached placements, higher studies or a career switch. Share your own honestly, without promising the same outcome for everyone.

Good community habits

Credit sources. Avoid spam and repeated self-promotion. Keep private conversations private. Do not post other people's personal information. Use the report option or **Support** for abuse; moderators can act on it.

FIELD NOTE

A good post answers a question someone will search for next semester. A great one links to the evidence.

FIND IT Alumni Connect › Community Feed · Alumni Connect › Events · Forums · Alumni Connect › Success Stories

YOUR PROGRAMME, YOUR PEOPLE

The school, *by programme.*

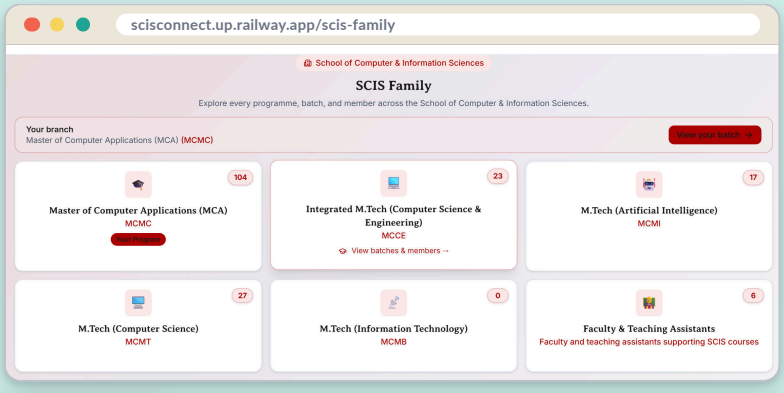

SCIS Family groups the community by programme: your branch, your batch, the people who sat the same courses. It is available from every menu, in both spaces and for every role.

ILLUSTRATION Classmates, drawn from their photographs.

ILLUSTRATION Classmates, drawn from their photographs.

SCREENSHOT SCIS Family: your branch at the top, then every programme (MCA, the M.Tech streams, Integrated M.Tech), faculty and TAs, scholars and others.

What you can do here

Open **Your Program** to see your branch and batches. Browse the people in a batch, open a profile, connect or message. It is the quickest route from *someone from 2022* to a name.

KEEP IT ACCURATE

SCIS Family depends on correct programme and batch details. If yours are wrong, fix them through Support before you look for people.

FIND IT SCIS Family SCIS Family › Your Program

RECRUIT WITH RELEVANCE

Find evidence. *Start a conversation.*

Approved recruiter access brings talent discovery, profile review and opportunity posting into one focused workspace. Access is granted after an admin reviews the request.

01 Search
Filter by skills, programme, batch, academics, coding activity and availability.

02 Review
Open a profile. Read projects and links; download the resume where the student allows it.

03 Shortlist
Bookmark relevant candidates. A bookmark is private to you.

04 Post
Publish a clear opportunity with eligibility, dates and a working application route.

Talent Search and Students

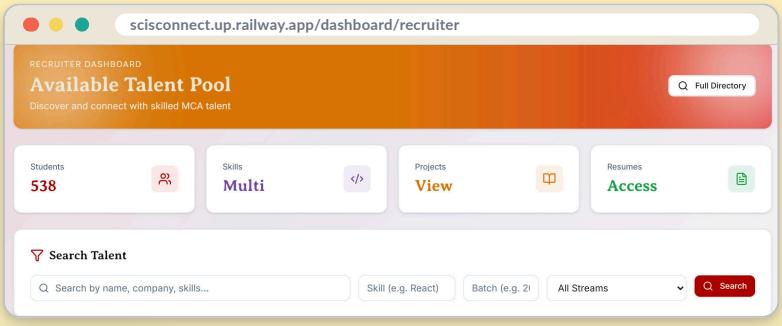

Talent Search is the community-wide people search. **Students** narrows to current students with the placement filters. Broaden a filter before concluding that nobody matches.

Contact details follow each student's privacy settings and the portal's permissions. Keep downloaded material confidential.

Post Job and Companies

Post Job creates a listing that students see in the Placement Center: role, requirements, eligibility, location, deadline and the link where they apply. **Companies** holds the organisation profile that your listings attach to.

Applications are tracked on the student side; make sure your external form actually works before publishing.

SCREENSHOT The recruiter dashboard: talent pool, Search Talent by name, skill, batch and stream. Captured on the test server with a test recruiter account.

What a good listing contains

- [ ] **Role and team** in plain language, not an internal code.
- [ ] **Eligibility** that matches how the portal filters: programme, batch, skills.
- [ ] **Process and dates**: rounds, deadline, expected timeline.
- [ ] **One working link** or email where the application is completed.

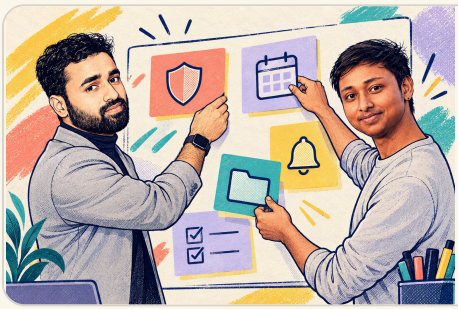

> **One caution.** A directory is a starting point for your own screening, not a hiring guarantee. Students see your listing, not your shortlist.

FIND IT Recruiter Dashboard › Talent Search · Recruiter Dashboard › Students · Recruiter Dashboard › Post Job · Recruiter Dashboard › Companies

TEACHING TOOLS / DESIGN

Build an assessment *with intent.*

The faculty workspace separates the parts: a Question Bank you grow over time, a Test Builder that assembles and configures a test, and audience tools that decide exactly who can take it.

Good questions.
Clear expectations.

ILLUSTRATION Kumar Shivam and Ashish Sharma, drawn from their team portraits.

Question Bank

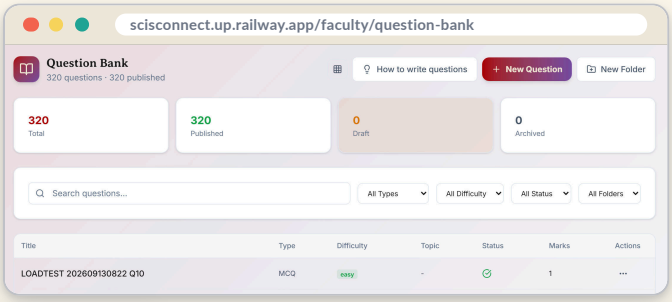

Create questions with type, marks, answers and explanations; organise them in folders; share selected ones with colleagues. **Question Guide** explains every format and how it is graded.

Test Builder

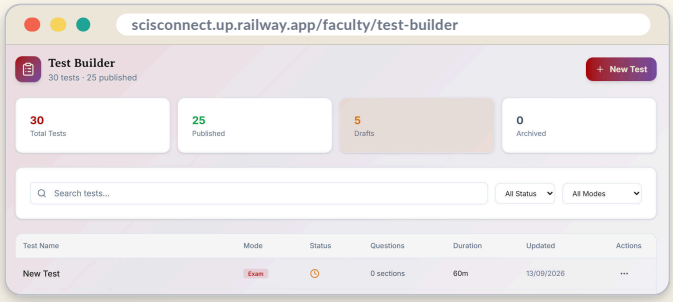

Add sections, pick questions from your bank, set schedule, duration, section timers, navigation, randomisation and security rules. Save as draft; publish when it is right.

Audience

Choose who can take the test: a stream and batch, a saved **Student Group**, or individual students. Alumni are never included. The audience is enforced, not decorative.

SCREENSHOT Question Bank: totals by status, search and filters, and the question list with type, difficulty and marks. Captured on the test server with sample data.

SCREENSHOT Test Builder: every test with its mode, status, sections and duration. New Test starts a draft. Test server, sample data.

FIND IT Faculty › Question Bank · Faculty › Question Guide · Faculty › Test Builder · Faculty › Student Groups · Faculty › Shared With Me

> **One caution.** Match the format to the skill. Automatic, runner-based and manual marking behave differently; check the grading note in the Question Guide before you rely on a type.

TEACHING TOOLS / DELIVERY

Publish carefully. *Review thoughtfully.*

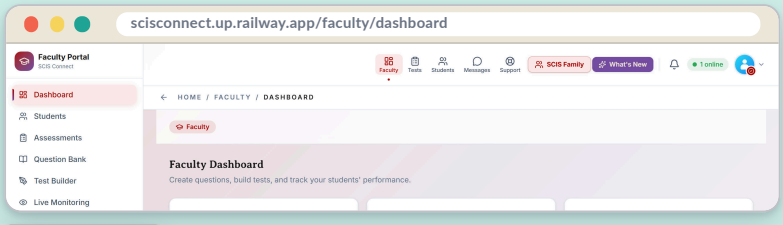

A test's life does not end at publish. Gate, monitor, evaluate, report and share: each has its own page in the faculty menu.

1. **Publish and gate**
   Publish from Test Builder. If the test uses a start gate, open it from **Published Tests Gate** when the room is ready; students wait at the gate until then.

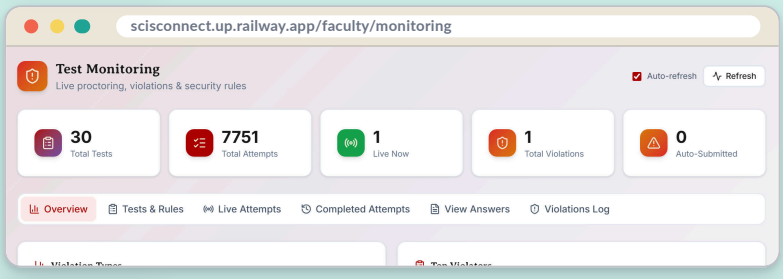

2. **Watch the session**
   Live Monitoring shows who is in, progress and alerts. **Proctoring** keeps the evidence; **Exam Control** extends time, locks, unlocks or force-submits an attempt. Read the evidence before acting.

3. **Evaluate**
   Open **Results & Analytics**. Auto-marked answers are ready; written answers need your evaluation. Re-evaluate when a question was wrong.

4. **Report and share**
   Reports exports per-test, per-student and stream/batch summaries as CSV or PDF. **Leaderboards** rank attempts. Share a test or delegate to a TA from the test's share page.

SCREENSHOT The faculty portal with its full menu. Test server, sample data.

SCREENSHOT Live Monitoring: live attempts, violations by type, rules.

SCREENSHOT Reports: pick a test, see who was involved, export CSV or PDF.

Activity Log

Every share, collaborator change, TA grant or revocation you make, listed in plain language with a time.

Tutorial

A written walkthrough of publishing a test. Video tutorials are marked as coming soon.

Students

Learners by stream and batch; feeds the audience picker and Student Groups.

FIND IT Faculty › Published Tests Gate · Faculty › Live Monitoring · Faculty › Exam Control · Faculty › Results & Analytics · Faculty › Reports

One caution. Tell students when instructions, timing or result availability change. For an incident, keep the test reference, the time and the visible error.

RESPONSIBILITY WITHOUT ROLE CONFUSION

Same student. *Added responsibility.*

A delegated role adds specific tools to a student's account. It does not make anyone an administrator, and it can be changed or withdrawn by whoever granted it.

TA · TEACHING ASSISTANT

Granted by a faculty member

Faculty open **Teaching Assistants**, pick a student and tick what they may do:

- ☐ **Manage Tests** — edit that faculty member's tests and questions.
- ☐ **View Results** — attempts, results and reports.
- ☐ **Live Monitoring** — watch and control live sessions.
- ☐ **Question Bank** — work in that faculty member's bank.
- ☐ **Full Access** — all four at once.

The **TA Dashboard** shows only that faculty member's tests. Two faculty members mean two scopes to switch between.

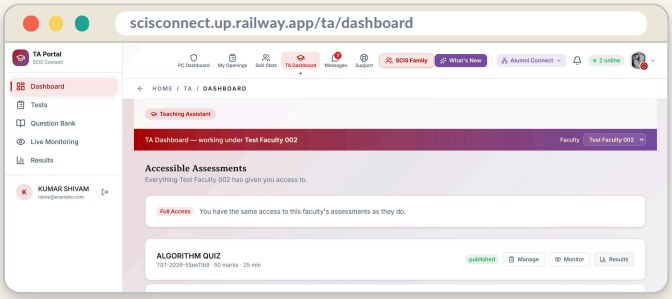

PC · PLACEMENT COORDINATOR

Granted by an admin

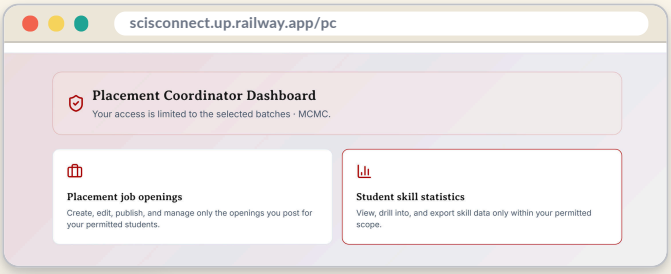

Admins open **Placement Coordinators** and give a student placement duties for an audience: their own batch, selected batches, a programme or wider.

- ☐ **Placement job openings** — create, publish and manage listings for that audience.
- ☐ **Student skill statistics** — view and export skill data within that scope.

A PC gets a small **PC Dashboard** next to the normal student menu and sees nothing outside the given audience.

SCREENSHOT A real TA Dashboard: "working under" one faculty member, the access level, and only that faculty member's assessments.

SCREENSHOT A real PC Dashboard: the access note names the permitted batches, and the two tools sit inside that scope.

CR · DCR · CLASS REPRESENTATIVE AND DEPUTY

Admins can name class representatives under **Class Representatives**, but the tools that designation unlocks belong to the shelved Classroom workflow (page 24). Being named CR today opens no classroom controls in the default release.

IF A TOOL IS MISSING

Ask the person who granted the role to check it. Do not borrow their account or ask for more access than the task needs.

FIND IT Faculty › Teaching Assistants | TA Dashboard | PC Dashboard | Admin › Delegated Access

THE MANAGEMENT WORKSPACE

The right control, *in the right place.*

The admin console is organised by what you are trying to do, not by database table. Nine groups; each answers one question.

Overview

Where the numbers live.

Overview, Analytics, My Admin Profile

People & Access

Who is on the portal and who is waiting. Approve faculty, recruiter, admin and roll-number requests; verify accounts.

All Users, Admin Team, Admin Requests, Faculty Requests, Recruiter Requests, Roll Number Requests, Verification

Delegated Access

Grant and inspect the student-side roles from page 20.

Placement Coordinators, Teaching Assistants, Class Representatives

Academic Operations

The Test Portal mirrors the faculty tools for admin-run assessments; Skill Stats summarises the community's skills.

Test Portal, Skill Stats

Community Settings, Support Tickets, Contact Messages, Reg. Help

Security & Audit

Who signed in from where, and what admins changed.

Login History, Audit Logs

Automation & System

Challenge configuration, app content, the ATS analyzer settings, and server, cron and system status.

Challenges, App Management, ATS Analyzer, Server Monitoring, Cron Monitor, System Status

Before a high-impact action

Check the target audience, preview the message where possible, and read the history afterwards. Super-admin controls reach further than ordinary admin access; use the narrowest role that does the job.

FIND IT **Admin › Dashboard** **Admin › People & Access** **Admin › Communication** **Admin › Security & Audit**

This page describes the console's purpose. It does not document internal endpoints, security architecture or configuration values.

EVERYDAY USE

Catch the update. *Keep the context.*

Notifications tell you that something happened; the page they point to tells you what to do. Treat the inbox as a place to return to, not a one-time alert.

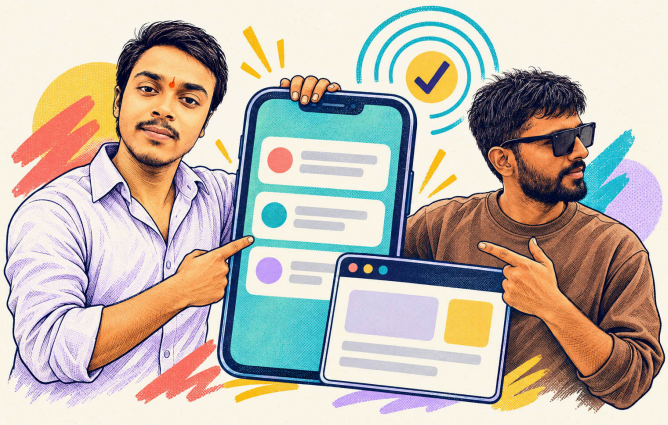

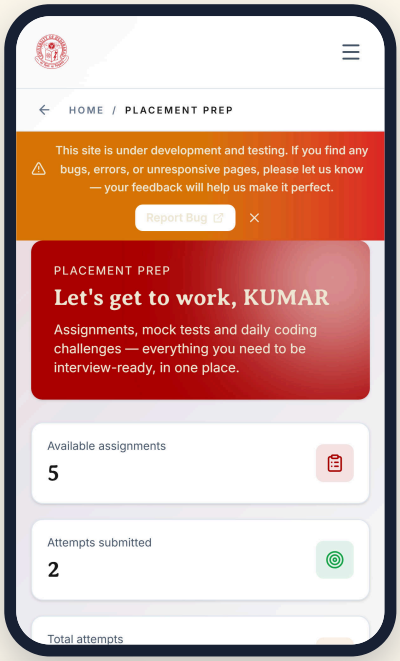

ILLUSTRATION Aman Kumar and Vijay Singh Parihar, drawn from their team portraits.

SCREENSHOT The portal in a phone browser.

The bell

The bell at the top shows unread notifications: a published test, a mentorship reply, a placement update, an announcement. Open one to jump to its page; mark them read as you go.

Email

Important events also go to your registered email: verification, password OTPs, some announcements and test notices. Keep that address current and check spam once.

On your phone today

The website works in a mobile browser; the menu collapses and pages reflow. A companion mobile app is being built by the team, and admins have a push console for registered devices, but this edition does not announce an app-store release. When it ships, you will hear about it on the portal.

FIND IT **Bell icon › Notifications** **Profile › notification settings**

One caution. A push alert or an email is a delivery channel, not proof that everyone received it. If you are the organiser, publish the change on the portal too.

WHEN SOMETHING DOES NOT LOOK RIGHT

A quick way *back on track.*

Most problems have a short path: a recovery link, a settings page, or a support ticket with enough detail to act on.

I forgot my password.

Use **Forgot Password?** on the login page. You receive a 6-digit OTP at your registered email and set a new password of at least 8 characters.

I forgot which email I registered with.

Use **Forgot Email?** on the login page. Enter your roll number and confirm with the OTP sent to the address on record.

My menu, batch or community status is wrong.

Check which account and space you are in. Then open **Support** or **Registration Help** and say what is wrong. Do not create a second account.

A page is empty or my request is still pending.

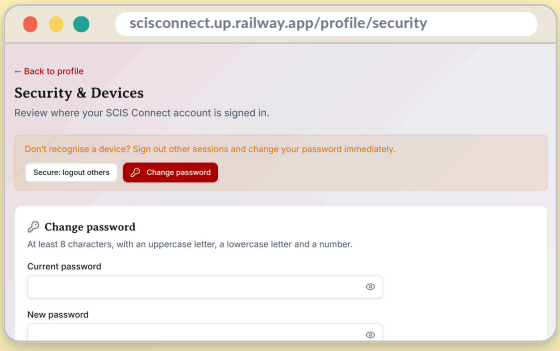

An empty list often means nothing has been published to you yet. A pending request needs the responsible person's decision; give it time before you chase.

I do not recognise a signed-in device.

Open **Profile › Security & Devices**. Sign out the unfamiliar session or all other devices, then change your password.

A link, test or upload is failing.

Note the page, the action, the time and the exact message. Attach a screenshot with personal details blurred to a **Support** ticket. Never include a password or OTP.

SCREENSHOT Security & Devices: sign out other sessions, change your password, review active devices.

ILLUSTRATION Classmates, drawn from their photographs.

Support

Open a ticket for account, access or bug problems. You can follow its status under Support.

Contact Us

A general message to the team. Your sent messages are kept under My Contact Messages.

Report an issue

A quick form for something broken on a page. Include what you expected and what happened.

FIND IT **Support** **Contact Us** **Report an issue** **Profile › Security & Devices**

One caution. Protect the community: use your own account, sign out on shared devices, keep private information out of public posts, and confirm external links before you share data or make a payment.

A CLEAR STATUS NOTE

Classroom. *Not open yet.*

CURRENTLY SHELVED

The current release focuses on Placement Prep and Alumni Connect. Classroom is switched off by default while those two spaces are stabilised. The code exists; the switch is off on purpose.

THE DIRECTION · NOT A LIVE FEATURE LIST

A class home

Your batch's subjects, study materials, previous-year questions and useful links in one place.

A clearer schedule

Upcoming exam dates with tentative or confirmed status, and an academic calendar.

Shared responsibility

Scoped CR and DCR tools and faculty controls for classroom updates and join requests.

Elective communities

Faculty-led elective offerings with eligibility-based joining.

WHAT THIS MEANS FOR YOU TODAY

There is no Classroom entry to follow in the default build, no beta to join and no launch date promised here. **Assignments and tests are not Classroom:** they live in Placement Prep today and keep working. Homework submission and marking inside Classroom are future work.

Electives are semester-specific. A syllabus catalogue is not a list of classes currently running. Confirm real offerings and eligibility with the faculty or the department.

HOW YOU WILL KNOW IT IS BACK

1 · THE PICKER

A third card, **Classroom**, appears next to Placement Prep and Alumni Connect after sign-in.

2 · THE MENU

A **Try Classroom Beta** link shows up in the General section of the student menu.

3 · THE ANNOUNCEMENT

The portal's **What's New** page and the notification bell carry the release note.

Until then: Placement Prep for the work, Alumni Connect for the people.

Source: the frontend and backend Classroom status notes and feature switches reviewed for this edition. Availability can change with a future release.

THE FACES BEHIND THE PORTAL

Built by people *you can recognise.*

Seven SCIS students built and maintain SCIS Connect. These are their portraits from the portal's Developers page, with the roles they hold there. They join their classmates as the illustrated guides in this issue.

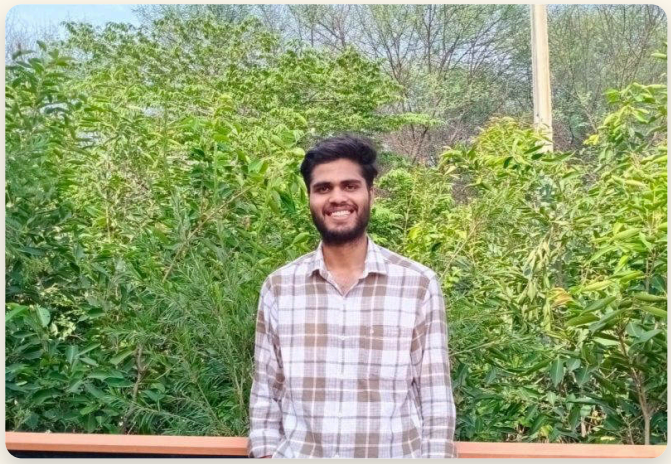

Kumar Shivam

TEAM LEAD & PRODUCT MANAGER

Sets product direction, keeps the team aligned, and makes sure what ships matches what the community actually needs.

Product Strategy · React · Leadership · Roadmapping

Adarsh Pandey

BACKEND DEVELOPER

Builds the services, data models and APIs that power Placement Prep, Alumni Connect and everything behind the scenes.

Node.js · Express · MongoDB · Socket.io

Sahil Kumar

QA ENGINEER

Tests flows end to end, catching what breaks before users do and keeping releases stable under real usage.

Manual Testing · Test Cases · API Testing · Regression

Ashish Sharma

QA ENGINEER

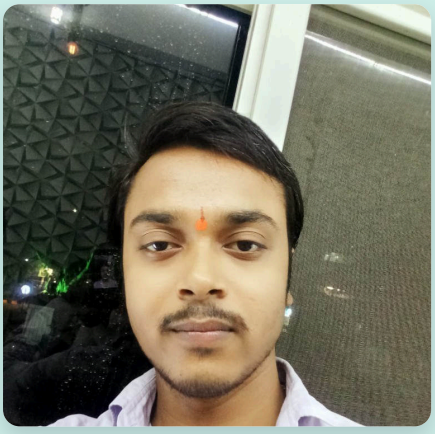

Obsesses over edge cases, broken states and the small failures that make a product feel unfinished.

QA · Bug Tracking · Automation · Cross-browser

PRODUCT / ENGINEERING / QUALITY

Many skills. *One shared project.*

The rest of the team, and where to find the current roster online. Roles and descriptions are taken from the portal, not written for this magazine.

Aman Kumar

MOBILE DEVELOPER

Builds mobile experiences that feel native: fast, responsive and ready for how students use the product on the go.

Kotlin · Android · Spring Boot · Jetpack Compose

Garv Agarwal

FULL STACK DEVELOPER

Builds across the stack: interfaces, APIs and the systems that keep the product working in production.

React · Node.js · MongoDB · Express

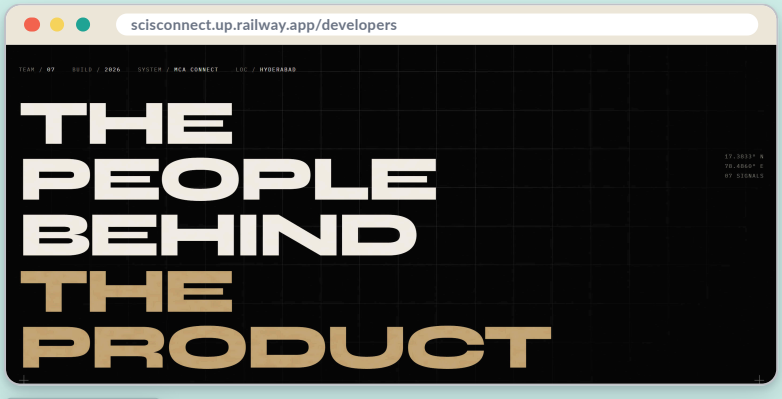

Vijay Singh Parihar

FULL STACK DEVELOPER

Designs the product end to end, from the interface people touch to the systems that keep it alive.

React · Node.js · MongoDB · PostgreSQL

Delegated

TA Dashboard · TA: Assessments · TA: Test Builder · TA: Question Bank · TA: Exam Control · TA: Results · PC: Placement Jobs · PC: Skill Stats

GLOSSARY

Space — Placement Prep or Alumni Connect: the half of the portal a current student is in. Not a role.

Audience — The exact set of students who can take a test. Set by faculty from stream, batch, a Student Group or individuals.

Start gate — A faculty-controlled door on a published test. Students wait until it opens.

Attempt — One sitting of a test, with its own status: in progress, submitted, evaluated.

Question Bank — A faculty member's reusable questions. Shared questions appear in a colleague's bank under Shared With Me.

Student Group — A saved list of students a faculty member can reuse as an audience.

Community status — Whether the portal treats you as a current student, recent graduate or alumnus. It follows your roll number and batch.

Admin and super-admin menus are on page 21. Classroom menus are not built into the default release; see page 24.

CLOSING CHECKLIST

Your next step *can be small.*

Pick one thing. Do it well. Come back tomorrow.

- [ ] **Student** — Complete your profile and open one challenge or one job listing today.
- [ ] **Alumnus or alumna** — Refresh your organisation and role, then answer one request or share one story.
- [ ] **Faculty member** — Read the Question Guide, build one small test, and try the Reports page after it runs.
- [ ] **Recruiter** — Post one clear opportunity with a working link, then search by the skills it needs.

OPEN THE PORTAL

scisconnect.up.railway.app

Scan with your phone camera, or type the address. Sign in with your own account. Never share a login.

NEED HELP?

Support for account and access problems. **Contact Us** for anything else. **Report Bug** in the orange banner for a broken page. See page 23.

MEET THE TEAM

The seven builders are on pages 25 and 26, and on the portal's **Developers** page with their GitHub and LinkedIn links.

SHARE THIS GUIDE

Pass the PDF to a classmate, a junior, an alumnus or a recruiter. The map on page 27 is the one page to print.

ABOUT THIS EDITION

SCIS Connect community guide, September 2026. Written against the portal's code at frontend **4d0b2a7** and backend **7e75320**, reviewed on 13 September 2026, with screenshots from the live portal. Actual availability depends on the deployed release, your role and your permissions. Not an official publication of the University of Hyderabad.

Feedback and corrections: use **Support** or **Contact Us** on the portal.

CREDITS

Portraits — the development team, from the portal. **Illustrations** — AI-assisted artwork drawn from the supplied developer and classmate photographs, labelled wherever it appears. No stock people or invented testimonials. **Screenshots** — the live portal, September 2026, with personal details cropped or blurred.

Type — DM Serif Display, Lato and Kalam, all under the SIL Open Font License. **Brand mark** — the SCIS Connect logo, used as supplied.
